

CATO SPOTLIGHT RECESSED

This spotlight is mounted inside the ceiling and provides a discreet and stylish solution that also becomes a nice detail in your room. The spotlight provides point lighting towards objects that you want to illuminate, which contributes to a pleasant light atmosphere in the room. You can direct the spotlight towards paintings, bookshelves or another type of interior detail such as vases or decorative figures. The idea of this Cato Spotlight is to offer another installation option compared to our ready-made spotlight packages and surface-mounted spotlights.
