## HORISONT PENDANT 42,2CM

Created with inspiration and rooted in both Belid's history and the coastal location of Varberg, this lamp embodies a contrasting and well-balanced design. Featuring strictly streamlined screens, mouth-blown glass, and a hovering top detail, it forms a unity that is both classic and modern. The horizontal lines in its design evoke the awe-inspiring horizon of the open sea, giving the lamp an almost floating top detail. With a diameter of 42.2 cm and a height of 10.6 cm, it comes equipped with four integrated LED light sources with a total power of 19 watts. Producing 1200 lumens and a color temperature of 2700, it creates a warm and pleasant atmosphere in the room. The lamp comes with a 3-meter-long cable and hook suspension for easy installation. With an IP rating of 20 and insulation class I for added safety, it fits perfectly in your kitchen or living room, and every time you gaze upon it, it provides the sensation of being by the sea. Designer Joakim Fihn.
